

Rhythm Master – DAO & Treasury Transparency

Rhythm Master is designed with long-term sustainability and player trust in mind. This document outlines how funds are managed, allocated, and governed.

Treasury Sources

- Season Pass sales (primary source)
- In-game SSN sinks (boosts, cosmetics, upgrades)
- Marketplace royalties from Sublime Sounds NFTs
- Sponsored events & partnerships (future)

Treasury Allocation Model

Allocation	Percentage	Purpose
Season Prize Pools	65%	Player rewards & competition incentives
Champion Super Prizes	15%	High-impact seasonal rewards
Operations & Development	10%	Servers, development, audits
DAO Reserve / Treasury	10%	Future seasons, emergencies

DAO Governance (Planned)

DAO governance will be introduced in phases:

Phase 1 – Transparency

- Public reporting of season revenue and payouts
- On-chain wallet addresses disclosed

Phase 2 – Voting

- SSN-weighted voting on season parameters
- NFT-based voting rights for Season Pass holders

Phase 3 – Full DAO

- Treasury proposals
- Community-driven reward tuning
- New game mode funding

Audit & Trust Commitments

- All reward payouts verifiable on-chain
- Treasury wallets published publicly
- No retroactive rule changes per season
- Emergency powers limited and disclosed

Our Commitment

Rhythm Master is built to reward skill, creativity, and community. Treasury transparency ensures every Season Pass directly supports players and the ecosystem.
